

Zhivar Sourati Hassanzadeh

NLP RESEARCH INTERN IN CENTRE FOR ARTIFICIAL INTELLIGENCE AT ZURICH UNIVERSITY OF APPLIED SCIENCES

☎ (+41) 76 772 3900 | ✉ zhivarsourati@gmail.com | 🌐 zhpinkman.github.io | 📷 zhpinkman | 🌐 zhivar-sourati | 📺 zhivarsourati

Education

Bachelor of Science, Computer Engineering

SCHOOL OF ELECTRICAL AND COMPUTER ENGINEERING, UNIVERSITY OF TEHRAN

GPA 4.0 / 4.0

Tehran, Iran

Sept. 2017 - Sept. 2021

Research Interests

- Applied Machine Learning
- Economics
- Reinforcement Learning
- Complex Networks
- Statistical Inference
- Natural Language Processing
- Information Visualization
- Business intelligence
- Data Mining

Research Experience

NLP Research Intern under Prof. Mark Cieliebak and Dr. Don Tuggener

Centre for Artificial Intelligence,
Zurich University of Applied Sciences

Oct. 2021 - Now

- Dialogue systems, Topic modeling, and automatic summarization.
- Hate speech analysis in Swiss-german texts in various domains such as Twitter.

Research Assistant under the Dr. Behnam Bahrak

Data Analytics Lab

Dec. 2020 - Oct. 2021

- Learned about complex networks, carried out multiple projects in this field, and read related papers, including surveys on analysis of the network of Twitter users.
- Analyzed the popularity of fanfictions using various attributes available on fanfictions, exploiting the tools and ideas discussed in social network analysis.
- Performed network inference on complex networks using various non-parametric tests, permutation tests, and exponential random graph models.
- Managed to collect all Persian tweets published from ten years ago until 2021 September, using two remote servers, one being used as a proxy tunnel and the second one as a database to store all the data in a well-structured format on Elastic.

NLP Research Intern under Dr. Mohammad Taher Pilehvar

TeIAS

Summer 2020

- Read papers about NLP and developed a deep understanding of state-of-the-art NLP models.
- Learned different topics in NLP and implemented specific tasks such as NER and QA chatbots to learn NLP more practically.

Publications

- Sourati Hassanzadeh, Z., Sabri, N., Chamani, H., & Bahrak, B. (2021). Quantitative Analysis of Fanfictions' Popularity. *Social Network Analysis and Mining*. (in revision)
- Chamani, H., Sourati Hassanzadeh, Z., & Bahrak, B. (2021). An Overview of Regression Methods in Early Prediction of Movie Ratings. *ICCKE2021*. (recently accepted)
- Setayesh, A., Sourati Hassanzadeh, Z., & Bahrak, B. (2021). Analysis of the Global Trade Network 2011 using ERGMs. (under preparation)
- Shabani Mirzaei, T., Chamani, H., Sourati Hassanzadeh, Z., Tavakoli, S., & Bahrak, B. (2021). Topic modeling of Persian tweets during the Covid-19 pandemic. (under preparation)

Honors and Awards

RANK 2ND AMONG ALL COMPUTER ENGINEERING STUDENTS(103)

2017 - 2021

* University of Tehran

RECEIVED SCHOLARSHIP, SUPPORTER FOUNDATION OF UNIVERSITY OF TEHRAN AS STUDENT WITH EXCEPTIONAL TALENTS

2017 - 2021

F.O.E * AWARD RANK 2ND AMONG ALL COMPUTER ENGINEERING STUDENTS(103), UNIVERSITY OF TEHRAN

2017 - 2021

* Faculty of Engineering

RANKED 156 (TOP 0.1%) IN IRANIAN UNIVERSITY ENTRANCE EXAM (ADMISSION TO UNIVERSITY OF TEHRAN*)

2017

* University of Tehran is the oldest, largest, and the most prestigious university of Iran and also the first rank university in Iran according to [U.S.News](#).

* I received this offer after I got the top score in the IAESTE selection exam. (International Association for the Exchange of Students for Technical Experience).

Notable Course Projects

Neural Networks

- Delved Deeper into the Memory Neural Networks from the most basic designs, like auto-associative networks, to the most complicated ones, Recurrent Neural Networks and their derivations such as LSTMs, GRUs, and Bert. Also, exploited the power of these models to train networks on various datasets such as bitcoin prices and texts extracted from tweets.
- Learned the principles of Convolutional Neural Networks and the models that fall under CNNs, including the Inception model and the U-net. Also, developed and compared different CNN models to analyze different aspects of their structures and designs.
- Analyzed the applications of Generative Adversarial Networks and their derivatives like cycle-GANs alongside Variational Auto-Encoders. Also, Implemented a cycle-GAN using the PyTorch framework.

Reinforcement Learning

- Solved different n-armed bandit problems with different policies considering different criteria such as regret and average reward, **utilizing Prospect theory by Daniel Kahneman to investigate the monetary value of waiting in a real-world problem.**
- Develop a load balancing framework on the famous jack's rental car problem using policy iteration algorithm.
- Analyzed different On-policy and Off-policy methods by comparing their accuracy and performance on different tasks.

Artificial Intelligence

- Learned and applied the basic models in AI such as clustering and regression models on various datasets, including the [bank churners](#) and [house prices](#) dataset.
- Analyzed different classification models such as random forests by applying them on various datasets and learning more about entropy and information-theory basics.
- Examined the performance of different searching algorithms such as A* and IDS on custom-built datasets.

Advanced Programming

- Learned different design patterns and also clean coding principles by implementing a handful of programs covering diverse subjects such as hotel management, social networks, and file compression & cryptography.
- Get to know the essential elements of game design by designing a game from scratch using the C++ programming language.

Teaching Experience as a Teacher Assistant

- | | |
|---|--|
| • Probability and Statistics in Engineering
Dr. Bahrak | • Design and Analysis of Algorithms
Dr. Mahini |
| • Theory of Formal Languages and Automata
Dr. Hojjat | • Artificial Intelligence
Dr. Yaghoubzadeh , Dr. Fadaei |
| • Advanced Programming
Dr. Khosravi | • Database Systems
Dr. Shakeri |

Volunteer Experience

Member of the Organizational Committee

[FSEN 2019](#)

Spring 2019

FSEN is an international conference that aims to bring together researchers, engineers, developers, and practitioners from the academia and the industry to present and discuss their research work in formal methods for software engineering. Students were responsible for preparing anything their assigned professor needed from their arrival, during their stay, and till their departure.

Student Staff

[IPM Cognitive Science contest](#)

Spring 2019

Brainstorming and cognitive neuroscience student competitions are planned to create interdisciplinary collaboration. Providing anything necessary for holding the contest and the conferences were part of my responsibilities.

Work Experience

Front-end Developer

Tehran, Iran

[TAPSELL CO.](#)

Sept. 2019 - Jan. 2020

- Developed the landing pages for two of the products owned by the company, [Tagrow](#), and [Metrix](#).
- Developed various features for the customer and management dashboard in the [Tapsell](#) product.

Languages

English

- TOEFL - OVERALL: 107, READING: 30, LISTENING: 29, WRITING: 27, SPEAKING: 21
- GRE - VERBAL REASONING: 150, QUANTITATIVE REASONING: 168, WRITING: 4.5

Persian

NATIVE

German

BEGINNER

Skills and Qualities

Programming Languages

PYTHON, R, C, C++, SQL, JAVA, JAVASCRIPT (ES5, ES6), TYPESCRIPT, HTML5, CSS, SCSS, VERILOG, KOTLIN, MATLAB

Tools and Frameworks

PYTORCH, KERAS, STATA, LINUX, SPRING, REACT, ANGULAR, JQUERY, AJAX, GIT, BOOTSRAP, MONGODB, LATEX, NODE JS.,
QUARTUS, MYSQL, ANDROID STUDIO

Personal Qualities

DILIGENT, ORGANIZED, EXPERIENCED IN TEAM-WORKING, CURIOUS FOR NEW IDEAS, FAST LEARNER, AND OPEN TO NEW SITUATIONS.
